Mr. John Appleyard - Works Mgr.
Marlin Rockwell Co.
Plainville, Conn.

Dear Mr. Appleyard;

Re: Lagoon Waste

In accordance with my recent conversation with Mr. Fischer I have had Rollins-Purle, Inc. prepare the attached tentative proposal covering the removal of Lagoon sludge and waste oils under present conditions. This proposal as you know envisions the removal of the sludge to the Rollins plant at Logan County in New Jersey which accounts for the high transportation costs. However, as we see it this is the only satisfactory method of cleaning up this lagoon rather than to move the sludge from your area to just another land fill spot in the State.

After you have your final figures from the BCS Company I feel it would be to your advantage if I brought in the Rollins technical people to discuss the final decision with you.

Sincerely,

George H. Rohrs

Attention: Mr. Peter Fischer

Re: RP #1079

Dear Mr. Fischer:

As we discussed, this letter provides tentative costs for disposal of your lagoon oil and sludge waste. We understand there is approximately 300 M gallons of flocculated sludge and 200 M gallons of oil in your lagoon. These prices do not include skimming costs for removing the material from the lagoon surface.

TREATMENT:

Oil and Sludge (500 M gallons).....8¢/gallon
Sludge only (300 M gallons).....14¢/gallon

TRANSPORTATION.....\$220.40/load +
55.1¢/CWT
over 40 M lbs.

The material can be shipped in 6000 gallon bulk aluminum carriers. The flocculated sludge has a gallon weight of 7.06 lbs.

We are available at your convenience for further discussions on loading and shipping arrangements.

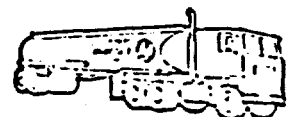

We request your purchase order.

Very truly yours,

George Rohrs
Marketing Representative
